Join the Lab!

Science needs communication - well designed communication.

The Science Communication Lab is a design studio specializing in innovative visual communication for scientific institutions and in the communication of complex, explanation-intensive topics. For example, we produce interactive exhibits for congresses, museums and exhibitions, infographics and information design for print and presentations or web-based applications. You can find examples of our work which has been honored with renowned design awards at: www.scicom-lab.com

As a young start-up based in Kiel, Germany, we are currently in an ongoing and exciting development phase. To support the team of designers, scientists and developers, we would like to offer the following position in our Kiel studio as soon as possible:

Software Developer /Creative Coding

Tasks:

- Development of software for interactive formats
- Creative collaboration with the design and concept team

Qualification:

- Committed and independent work and a special Interest in intuitive and innovative user interfaces
- Enjoy learning about the most appropriate technology for various projects in particular: Java / OpenGL / GLSL / OpenGL ES / HTML5 / VR / AR
- Initial programming experience in Web GL desirable
- Fulfilling different roles of software development in projects: Creating, implementing and testing software, install, maintain, improve and support customers
- Independently set priorities, keep to schedules and Present progress reports.

We are very much interested in young professionals who have gained programming experience during their studies, which corresponds to about two years of professional experience.
